Create storyboards to represent the user flow for a mobile app (e.g., food delivery app) using Balsamiq

The aim is to create storyboards representing the user flow for a mobile E-commerce app using Balsamiq.

Procedure

1. Tool Used: Balsamiq Wireframes (https://balsamiq.com)
2. I created a new project and added mobile screens to simulate the user's shopping experience from start to finish.
3. Each screen represents a key step in the product browsing and purchase process.
4. UI components like buttons, text fields, dropdowns, images, and icons were selected from Balsamiq's built-in library.
5. All wireframes were designed to be simple, clean, and focused on user interaction and flow.

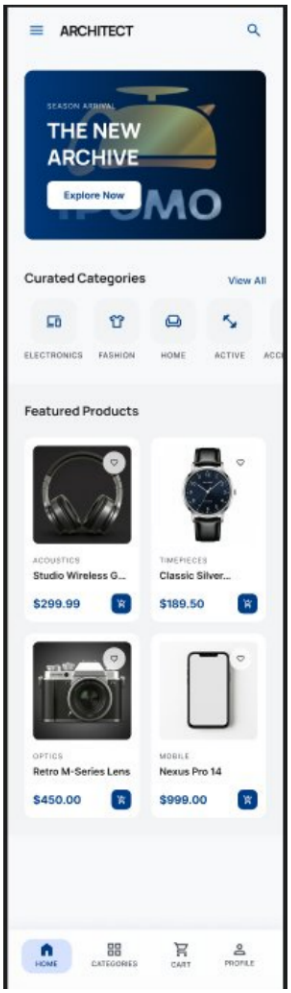
User Flow

1. Homepage – Users can browse featured products, search for items, and navigate to different categories.
2. Categories Screen – Displays various product categories such as Electronics, Fashion, Home, etc.
3. Product List Screen – Shows a list of products within a selected category, with image, name, price, and "Add to Cart" button.
4. Product Details Screen – Detailed view of a single product with description, images, price, and "Add to Cart" button.
5. Checkout Screen – Shows the cart with total price, delivery address input, and a button to proceed.
6. Payment Confirmation Screen – Displays payment options and a confirmation message after successful payment.

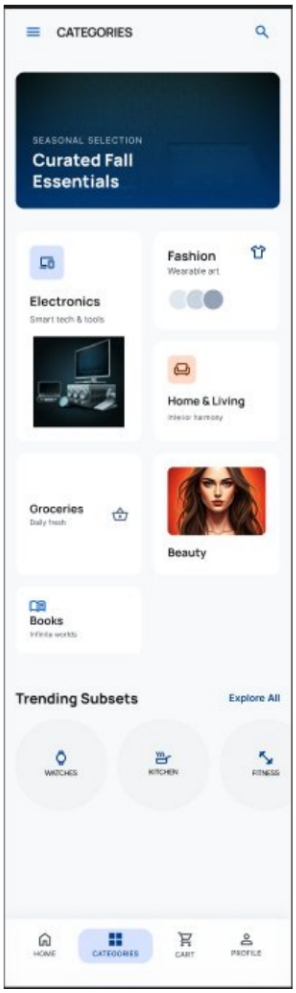
Homepage

- **Components:**
  - Search bar
  - Banner/Carousel for offers
  - Navigation buttons to categories
  - Featured products with thumbnail, price, and "Add to Cart"
- **Purpose:**

Starting point for exploring and engaging with the app's product offerings.



Homepage



Categories Screen

Categories Screen

- **Components:**
  - Grid or list view of categories (e.g., Electronics, Fashion, Groceries)
  - Icons/images representing each category
- **Purpose:**

Help users easily filter products based on interest.

Product List Screen

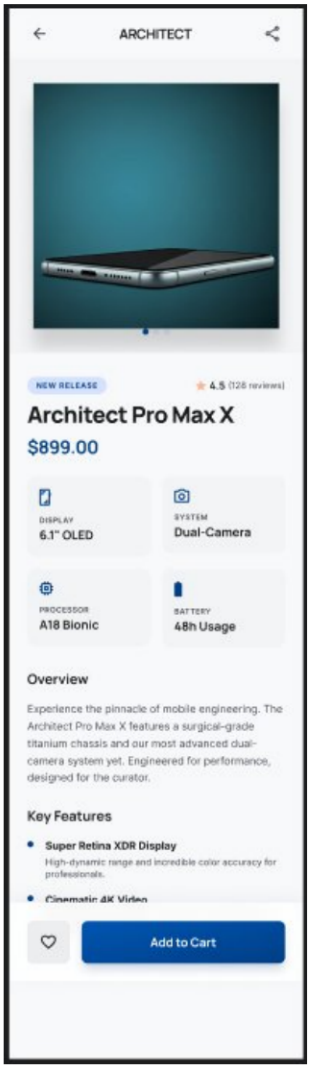
- **Components:**
  - Scrollable list of products
  - Product image, name, price
  - "Add to Cart" button for each product
- **Purpose:**

View and select products within a specific category.

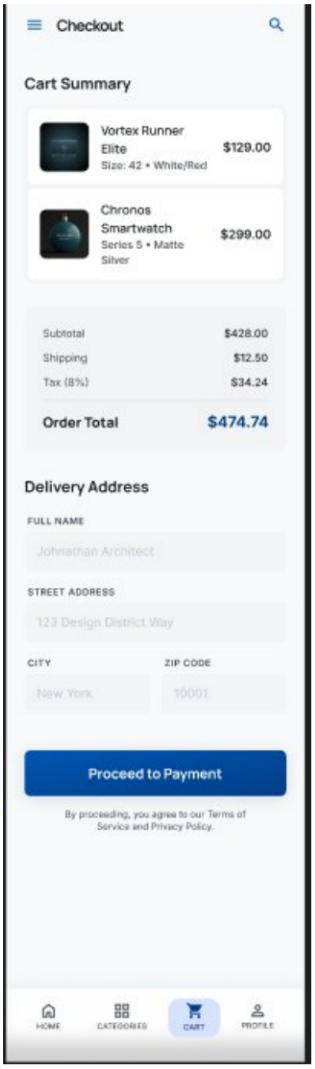
Product Details Screen

- **Components:**
  - Product image gallery
  - Title, price, ratings
  - Description and specifications
  - "Add to Cart" button
- **Purpose:**

Provide full information about a product to aid in purchase decisions.



Product Details Screen



Checkout Screen

Checkout Screen

- **Components:**
  - List of items in cart with price breakdown

- Input fields for delivery address
- "Proceed to Payment" button

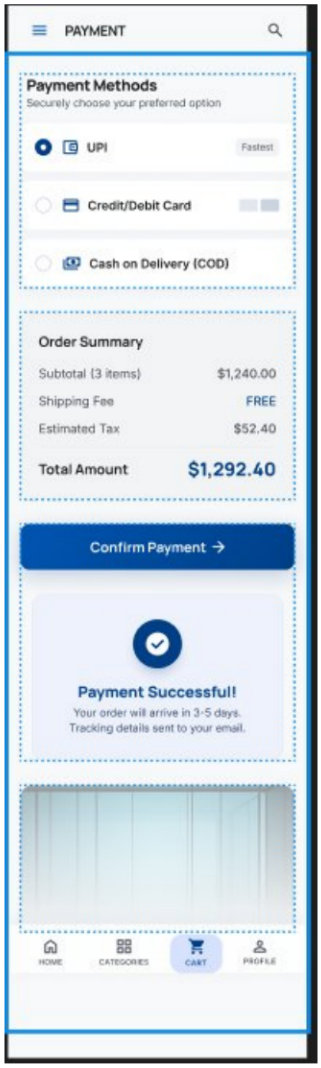
- **Purpose:**

Let users review their order and enter delivery details.

Payment Confirmation Screen

- **Components:**
  - Radio buttons for payment methods (UPI, Credit Card, COD)
  - Order summary and total cost
  - "Pay Now" or "Confirm Payment" button
  - Confirmation message (e.g., "Payment Successful! Your order will arrive in 3-5 days.")
- **Purpose:**

Final confirmation step that assures the user the transaction is complete.



Payment Confirmation Screen
